## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment and remarks filed March 4, 2008, are noted with appreciation.
2. Claims 1-4 and 6-10 remain pending.

### ***Information Disclosure Statement***

3. The information disclosure statements filed December 7, 2007, and January 28, 2008, have been considered.

### ***Response to Arguments***

4. The rejections set forth in the prior Office action are withdrawn in view of the amendment.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/64805 A2.

A. This reference teaches all of the limitations of the claims. See the abstract for example.

B. While this reference recites a “shear storage modulus” instead of a “storage elastic modulus,” US 5,670,006 A [5:14 ff.] and Moresi et al., *Journal of*

*Food Engineering* 50 (2001) 235-245 (see pp. 239-240) are cited solely as evidence that these two terms may be used interchangeably.

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claim 10 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 12 of U.S. Patent No. 6,660,354. Although the conflicting claims are not identical, they are not patentably distinct from each other because, as noted above, the subject matter of the copending claim is fully encompassed by the instant subject matter.
